

Are you eligible for funding to improve your home energy efficiency?

0800 Repair are a local insulation, heating and renewables company who are working to help qualifying households benefit from free energy saving measures.

If you qualify, and your local authority is Darlington Borough Council, you could be eligible to have your old heating system upgraded, solar panels installed or a renewable heating system fitted 100% free of charge.

Which energy saving measures are available?

Gas Boiler Upgrade

If you have an old, non-condensing type gas boiler, typically installed before 2005, you could be eligible to have a new A+ rated gas boiler installed completely free of charge.

If you are unsure if your boiler qualifies, please make a note of the make and model of your current boiler and call 0800 Repair for further information.

If your home qualifies for a boiler upgrade, you could also have free energy saving home insulation installed.

Air Source Heat Pump

If your home is heated by either electric panel heaters or LPG, you could qualify to have a new renewable heating system installed in your home completely free of charge.

For homes not connected to the mains gas network, air source heat pumps can save up to 40% on energy bills compared to heating the home with LPG or electricity.

By making the switch to heat pump technology, you'll enjoy a warm home and save money, all while reducing your carbon emissions.

Solar Panels

If you qualify to have an Air Source Heat Pump installed, you could also be eligible to have solar panels installed at your home.

By utilising natural energy from the sun, you can reduce your carbon footprint and because you are generating your own electricity, solar energy can help to protect you against price increases from energy suppliers.

Do I qualify?

To be eligible for the scheme you must be a Darlington Borough Council resident and you must own your home.

Your home must have an EPC energy rating of E, F or G. If your property does not have an EPC rating, please contact us and we will arrange for an EPC to be conducted.

You must also fall into ONE of the categories listed below.

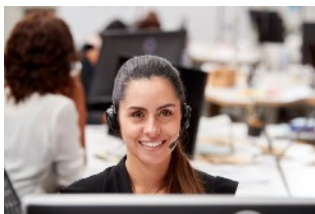

Your total household income is less than £31,000 a year.

- OR -

You, or any permanent resident of your home is receiving a qualifying benefit.

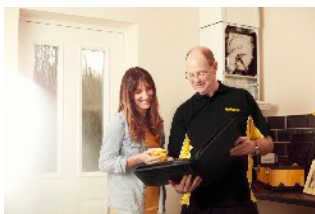

Please contact us for more information on eligibility criteria.

The Process

Call 0800 Repair on
01325 520 052

Our team can answer your questions and help you find out if you qualify.

An appointment will be made for an energy assessor to visit you at home to discuss available energy saving measures and confirm your eligibility.

Following your assessment, a technical survey will be carried out for the measures you are interested in and subsequent install dates are arranged at your convenience.

To apply or to find out more,
