

The Stroke Research Patient and Carer Panel: a stroke research involvement group is looking for new members!

WHO?

A group of people who are interested in stroke:

- some of us have had a stroke
- some of us are caring for a loved one who has had a stroke
- some of us work with stroke patients
- some of us are involved in stroke research

"I got involved to help myself and the people who helped me"

VISION

to enable all stroke patients to learn about, and have the opportunity to participate in stroke research

WHAT, WHEN & WHY?

As a group, we meet several times a year in person and remotely to hear about and offer our views on proposed clinical research studies.

We play a necessary and important role by sharing our real life experiences of stroke and our enthusiastic belief that stroke research can improve future clinical practice.
